

	Autumn 1	Autumn 2	Spring 1	Spring 2	Summer 1	Summer 2
10	Communicable Diseases Prevention and treatment	Non communicable disease Photosynthesis and respiration	Nervous system Endocrine system	Homeostasis Reproduction	Effect of Human interactions on ecosystems	Cells Cell division Transport of substances
11	Variation Evolution	Evolution Adaptations	Adaptations Interdependence	Effect of Human interactions on ecosystems		
12	Microscopy Classification Biodiversity	Biological molecules Enzymes	Disease Plasma Membranes	Cell division Exchange surfaces Transport in plants Transport in animals	Transport in plants Transport in animals	Practical assessments
13	Neuronal communication Ecosystems Populations	Hormonal communication Homeostasis	Respiration Genetics of living systems Patterns of inheritance Energy for Biology	Manipulating genomes Cloning and biotechnology	Revision
