

Humanities in Film

The humanities movie club is a after school club, run by Mr Hope, in which movies or documentaries based on historical events or geographical features are shown. This club would be beneficial as it helps students learn about history and geography in a fun way. It can also provide a safe space for students to gain confidence in social classes. It creates unity across different year groups and ages. This club caters for visual learners and allows students to experience past events through different perspectives. It supports students to understand the concept of theme, style, and genre.

Some of the titles being shown are:

- Dunkirk
- Night on Earth
- The Imitation Game

These are only a few of the many movies!
